Software Developer | Backend & Systems

Computer Science & Business Systems undergraduate focused on backend engineering, systems development, and web applications. Built a relational database engine in C++ and a multi-bank UPI payment ecosystem with Spring Boot and MySQL. Experienced with Java, C++, Python, JavaScript, React, and SQL.

WORK EXPERIENCE

Jabsz Gaming Studio • Remote • 05/2025 - 07/2025

Web Development Intern • Internship

- Developed interactive UI components for **Lava Climb**, a browser-based game built with **React** and **Expo**.
- Implemented game interactions and physics-driven mechanics using **Matter.js**.
- Integrated frontend functionality with **backend APIs** and debugged issues across the application.
- Used **Git-based** workflows with branches, pull requests, issue tracking, and Kanban boards throughout development.

PROJECTS

EmberDB — Database Management System

C++17, SQL, B+ Trees, WAL

Built a relational database system from scratch in **C++17**, implementing persistent storage, buffer pool management, **B+ Tree indexing**, SQL parsing and execution with joins and aggregations, **ACID transactions**, **WAL**, and **ARIES-style crash recovery**, with a REST server and React web console.

UPI Payment Ecosystem — Multi-Bank Payment System

Java, Spring Boot, MySQL, React, Docker

Built a distributed UPI payment system with a central switch and independent bank services, implementing **pessimistic locking**, **double-entry ledgers**, **SHA-256 idempotency**, **compensating reversals**, **audit logging**, and **automated reconciliation**, with REST-based service communication and a React frontend.

AI Agentic Job Application Pipeline

Python, LangGraph, LLM APIs, React

Built an end-to-end agentic pipeline for job discovery and application preparation, using specialized AI workflows for **job matching**, **candidate profiling**, **resume tailoring**, **cover letters**, and **interview preparation**, with a React interface and automated document generation.

Indian Sign Language Translator

Python, TensorFlow, MediaPipe, OpenCV

Built a real-time Indian Sign Language recognition system by training a **TensorFlow model on a custom dataset** and using **MediaPipe hand detection** with OpenCV for webcam-based gesture recognition and translation into English text.

SKILLS

Languages:

- Java
- JavaScript
- Python
- C++
- Dart

Frameworks & Libraries

- React.js
- Express.js
- Node.js
- React Native
- Flutter
- SpringBoot

Databases

- MongoDB
- MySQL

Cloud & Services

- Firebase
- Appwrite

EDUCATION

XII in ICSE Board

Seth Anandram Jaipuria School

Kanpur

GPA: 78.5%

03/2021 - 03/2022

X in ICSE Board

Seth Anandram Jaipuria School

Kanpur

GPA: 85%

03/2018 - 03/2019

B.Tech in Computer Science & Business Systems

Amity University

Noida

GPA: 7.34
